

2014 Utility Improvements

Utility and Pavement Improvements

Project Update June 2014

Project Description

The 2014 Utility Improvement Project will encompass utility improvements at three locations throughout Arlington.

1. Gilman, Talcott, and Alcazar - Water and storm improvements will be installed in Gilman, Talcott, and Alcazar in the Old Towne portion of the City. Once utilities are installed, a new road surface will be installed.
2. 67th Ave Sewer Extension - The 67th Ave sewer main will be extended from 204th Street to the north entrance of the former NW Hardwoods site. The alignment of the new sewer main will be within the Centennial Trail.
3. 172nd St Sewer Extension A new sewer installed as part of the SR-9 Roundabout project will be extended along 172nd St from the Norpoint Shooting Range to 85th Ave. The alignment will cross 172nd St and connect to an existing sewer in 85th Ave.

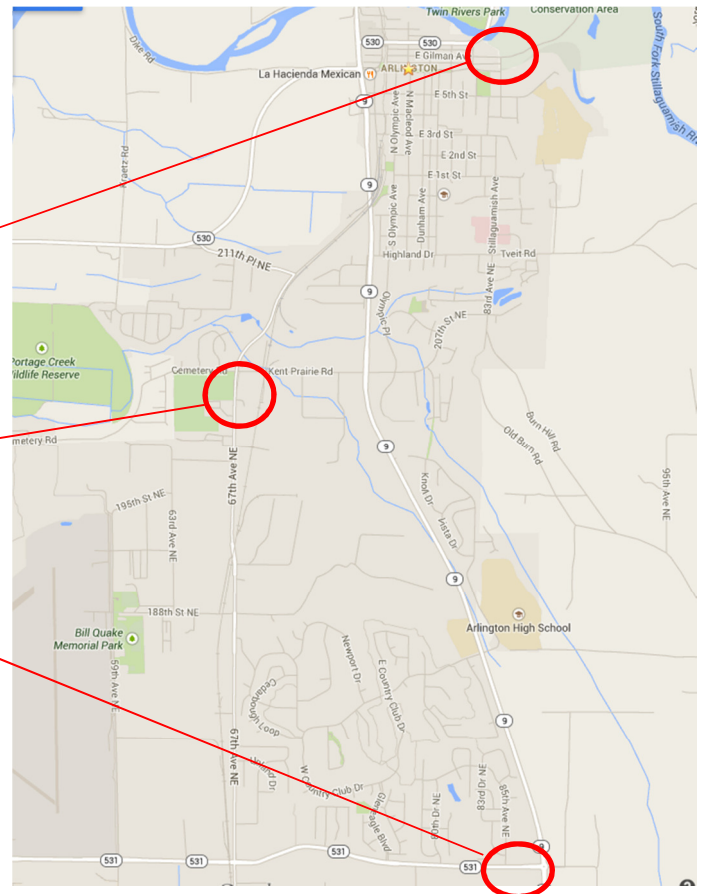

Project Benefits

- Provide expansion to the City's sewer infrastructure
- Replace aging water pipes which have higher maintenance costs
- Alleviate flooding in local neighborhood
- Improve roadway surface in local neighborhood

Schedule

- Begin Construction July 2014
- Complete Construction September 2014

Project Area Map

Project Funding

- City Water, Sewer, Storm Capital Improvement Funds
- Transportation Benefit District
